PROFESSIONAL SUMMARY

Full-stack engineer and data scientist with 3+ years shipping production systems in fintech and ML. Engineered a live banking and e-commerce platform handling KYC onboarding, FX wire transfers, and payment flows at Vista Point; built predictive ML models and distributed PySpark pipelines at Xient GmbH (Germany). Proven across Angular, NestJS, Python, PySpark, and AWS. Seeking roles at the intersection of engineering and data — fintech, fraud detection, and ML-powered products.

WORK EXPERIENCE

Vista Point

Full-stack Developer

North Macedonia

May 2023 – Present

- Engineered a multi-tenant banking and e-commerce platform (Angular, NestJS, MySQL, Redis) handling KYC onboarding, cross-border wire transfers, and FX trading — serving daily production users in a regulated financial environment.
- Cut feature delivery time ~40% by refactoring a monolithic Angular codebase into a reusable component library, eliminating duplicated logic across KYC, wire-transfer, and FX trade screens.
- Secured ~30 REST API endpoints covering compliance-sensitive operations — identity verification, fund transfers, and role management — by implementing JWT auth, refresh-token rotation, and RBAC in NestJS.
- Reduced high-traffic endpoint response times ~35% by introducing Redis read-through caching and rewriting inefficient MySQL queries, improving throughput under peak transaction load.

Xient GmbH

Data Scientist — SAP × Hypatos

Germany (Remote)

Jun 2025 – Present

- Built classification, regression, and time-series forecasting models with scikit-learn and custom feature engineering, achieving ~15% improvement in accuracy for revenue, churn, and demand prediction across enterprise clients.
- Designed distributed PySpark ETL pipelines integrating SAP ERP and Hypatos document-intelligence data, cutting manual data preparation time ~60% and surfacing decision-ready business insights.
- Deployed 3 production ML models into the SAP × Hypatos ecosystem, collaborating with cross-functional teams in Germany to translate business requirements into measurable forecasting outputs.

Support Kocani

Volunteer Developer

North Macedonia

Mar 2025 – Apr 2025

- Designed and shipped supportkocani.com (PHP/Laravel, AWS) within 72 hours of the Kocani disco fire, enabling real-time donation tracking for hundreds of affected families.
- Integrated OpenAI Vision API to automatically parse wire-transfer and cheque screenshots, eliminating ~4 hours of daily manual donation tallying and accelerating fund distribution to injured victims.

Freelance

Full-stack Developer & Tutor

North Macedonia

Dec 2021 – Present

- Delivered 2 production websites end-to-end (solar energy provider, PVC construction company) — requirements, UI/UX, full-stack development, and deployment — enabling clients with no prior web presence to generate online leads.
- Taught web development (Angular, Node.js, HTML/CSS/JS) and data science (Python, Pandas, SQL, ML, Deep Learning) across 1-on-1 and small-group sessions, adapting curriculum to individual skill levels.

Loka & nf-core — Bioinformatics Hackathon

Open-source Contributor

North Macedonia

Mar 2026

- Contributed code improvements, bug fixes, and documentation to nf-core Nextflow pipeline modules at an international hackathon, collaborating with researchers on reproducible bioinformatics workflows.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#, SQL, PHP, Bash/Shell

Web & APIs: Angular, NestJS, Node.js, .NET, Spring Boot, REST APIs, WebSockets, HTML5, CSS3, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB, Redis, AWS RDS, AWS Aurora

Data & ML: PySpark, Apache Spark, Apache Flink, Kafka, scikit-learn, Pandas, Deep Learning, ETL, MLOps, Databricks

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, CloudFront), Docker, Kubernetes, Jenkins, CI/CD, Git, Nginx

Platforms: SAP, Hypatos, HawkAI, Jira, Confluence, Postman, Contentful, Gitlab

SELECTED PROJECTS

KYC Verification Microservice

github.com/HowlinMan24/kyc-service

TypeScript, NestJS, JWT, Sequelize, Zod, Docker, OpenAPI

- Production-grade KYC service with Zod request validation, Sequelize ORM, JWT auth, and full OpenAPI documentation — mirrors the identity verification flows built at Vista Point.

CP-ABE Secure File Sharing

github.com/HowlinMan24/cpabe-secure-share

Python, CP-ABE (BSW07), AES-256-GCM, Docker

- Attribute-based encryption system combining CP-ABE policy enforcement with AES-256-GCM hybrid encryption for secure, access-policy-controlled file sharing — university Data Security project.

Diabetes ML Streaming Pipeline

github.com/HowlinMan24/diabetes-ml-streaming

Python, PySpark, Kafka, Docker, scikit-learn

- End-to-end ML pipeline: offline Spark model training + real-time inference via Kafka streaming producer/consumer — demonstrates the full production ML lifecycle from training to deployment.

Calendar SaaS App

github.com/HowlinMan24/CalendarWebApp

Angular, NestJS, MySQL, Docker, Nginx

- Full-stack multi-calendar web app with reusable Angular views (month/week/day), NestJS REST API, MySQL persistence, and Dockerized deployment with Nginx config for dev and production.

EDUCATION

Faculty of Computer Science and Engineering (FINKI), UKIM

Skopje, North Macedonia

B.Sc. Software Engineering & Information Systems

Certification: AWS Certified AI Practitioner | **Languages:** English C2 (Fluent) · German A2 · Macedonian (Native)
