PROFESSIONAL SUMMARY

Full-stack engineer and data scientist with **4+ years** shipping production systems in **fintech, e-commerce, and ML**. Engineered a multi-tenant banking and e-commerce SaaS platform with microservices architecture handling KYC onboarding, FX wire transfers, and payment flows at Vista Point. Built predictive ML models and distributed PySpark pipelines (Lambda architecture) at Xient GmbH (Germany). Experienced designing **Microservices, Multi-Tenant SaaS, Event-Driven, and Lambda architectures**. Proven across Angular, React, Node.js, Spring Boot, Python, PySpark, AWS, Java, SQL, NoSQL, JavaScript, CSS, and HTML.

WORK EXPERIENCE

Vista Point

North Macedonia

Senior Full-stack Developer

May 2022 – Present

- Engineered a multi-tenant banking and e-commerce SaaS platform with microservices architecture (Angular, Node.js, MySQL, Redis, Java, C#, HTML, CSS, JavaScript) handling KYC onboarding, cross-border wire transfers, and FX trading.
- Cut feature delivery time **~40%** by refactoring a monolithic Angular codebase into a reusable component library, eliminating duplicated logic across KYC, wire-transfer, and FX trade screens.
- Secured REST API endpoints covering compliance-sensitive operations - identity verification, fund transfers, and role management - by implementing JWT auth and refresh-token rotation.
- Reduced high-traffic endpoint response times **~35%** by introducing Redis read-through caching and rewriting inefficient MySQL queries, improving throughput under peak transaction load.

Xient GmbH

Data Scientist - SAP x Hypatos

Jun 2024 – Present

- Built classification, regression, and time-series forecasting models with scikit-learn on SAP ERP and Hypatos document-intelligence data, achieving **~15%** improvement in accuracy for revenue, churn, and demand prediction across enterprise clients.
- Designed distributed PySpark ETL pipelines (Lambda architecture: batch + streaming) integrating SAP ERP and Hypatos document-intelligence data, cutting manual data preparation time **~60%** and surfacing decision-ready business insights.
- Deployed **3** production ML models into the SAP x Hypatos ecosystem, collaborating with cross-functional teams in Germany to translate business requirements into measurable forecasting outputs.

Support Kocani

North Macedonia

Volunteer Developer

Mar 2025 – Apr 2025

- Designed and shipped supportkocani.com (PHP/Laravel, AWS) within **72** hours of the Kocani disco fire, enabling real-time donation tracking for hundreds of affected families.
- Integrated OpenAI Vision API to automatically parse wire-transfer and cheque screenshots, eliminating **~4** hours of daily manual donation tallying and accelerating fund distribution to injured victims.

Freelance

North Macedonia

Full-stack Developer & Tutor

Dec 2021 – Present

- Delivered **2** production websites end-to-end (solar energy provider, PVC construction company) covering requirements, UI/UX, full-stack development (HTML, CSS, JavaScript, PHP), and deployment, enabling clients with no prior web presence to generate online leads.
- Taught web development (Angular, Node.js, HTML/CSS/JS) and data science (Python, Pandas, SQL, ML, Deep Learning) across 1-on-1 and small-group sessions, adapting curriculum to individual skill levels.

Loka & nf-core Bioinformatics Hackathon

North Macedonia

Open-source Contributor

Mar 2026

- Contributed code improvements, bug fixes, and documentation to nf-core Nextflow pipeline modules at an international hackathon, collaborating with researchers on reproducible bioinformatics workflows.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#, C/C++, SQL, PHP, Bash/Shell

Web & APIs: Spring Boot, Angular, NestJS, Node.js, .NET, HTML, CSS, Tailwind CSS, REST APIs, WebSockets, Nginx

Databases: MySQL, PostgreSQL, MongoDB, Redis, AWS RDS, AWS Aurora

Data & ML: PySpark, Apache Spark, Apache Flink, Kafka, scikit-learn, Pandas, Matplotlib, Seaborn, Deep Learning, Data Mining, ETL, MLOps, Databricks, Statistics, Data Visualization, Bioinformatics

Cloud & DevOps: AWS (S3, EC2, IAM, CloudFront), Docker, Kubernetes, CI/CD, Jenkins, Git, GitHub, Linux/Unix, SSH

Architecture: Microservices, Multi-Tenant SaaS, Event-Driven, MVC, REST APIs, ETL Pipelines, Lambda Architecture, Hexagonal/Clean Architecture

Tools: SAP, Hypatos, GitHub, ClickUp, Postman, Jira, Confluence, GitLab, OpenAI API, Contentful

SELECTED PROJECTS

KYC Verification Microservice

github.com/HowlinMan24/kyc-service

TypeScript · NestJS · JWT · Sequelize · Zod · Docker · OpenAPI

- Production-grade KYC microservice (Hexagonal/Clean Architecture) with Zod request validation, Sequelize ORM, JWT auth, and full OpenAPI documentation — mirrors the identity verification flows built at Vista Point.

Diabetes ML Streaming Pipeline

github.com/HowlinMan24/diabetes-ml-streaming

Python · PySpark · Kafka · Docker · scikit-learn

- End-to-end Lambda architecture ML pipeline: offline Spark model training + real-time inference via Kafka streaming producer/consumer — demonstrates full production ML lifecycle from training to deployment.

CP-ABE Secure File Sharing

github.com/HowlinMan24/cpabe-secure-share

Python · CP-ABE (BSW07) · AES-256-GCM · Docker

- Attribute-based encryption system combining CP-ABE policy enforcement with AES-256-GCM hybrid encryption for secure, access-policy-controlled file sharing.

Calendar SaaS App

github.com/HowlinMan24/CalendarWebApp

Angular · NestJS · MySQL · Docker · Nginx

- Full-stack multi-calendar SaaS web app (Multi-Layered MVC, REST API) with reusable Angular month/week/day views, NestJS REST API, MySQL persistence, and Dockerized deployment with Nginx for dev/prod.

EDUCATION & CERTIFICATIONS

Faculty of Computer Science and Engineering (FINKI), UKIM

Skopje, North Macedonia

B.Sc. Software Engineering & Information Systems

AWS Certified AI Practitioner

Amazon Web Services

Languages: Macedonian (Native) · English (C2 Fluent) · German (A2)
