

HRISTIJAN MIJALKOV

FULL-STACK & AI ENGINEER

hristijanmijalkov5@gmail.com | Skopje, North Macedonia | linkedin.com/in/hristijan-mijalkov | dawnlearn.com | github.com/HowlinMan24

PROFESSIONAL SUMMARY

- 4+ years shipping production systems across fintech and enterprise software.
- Founded DAWN, a bilingual (EN/MK) teaching platform for coding and economics.
- Core stack: Angular · React · Node.js · Go · AWS · MySQL · PostgreSQL · TypeScript · Terraform.

EDUCATION & CERTIFICATIONS

Faculty of Computer Science and Engineering (FINKI), UKIM
B.Sc. Computer & Software Engineering

Skopje, North Macedonia

Certifications: AWS Certified Cloud Practitioner

Languages: Macedonian (Native) · English (C1) · German (A2)

WORK EXPERIENCE

Vista Point

Skopje, North Macedonia

Senior Full-Stack Developer

May 2022 – Present

Tech: Angular, Node.js, MySQL, Redis, JWT, OAuth 2.0, Docker

- Built and maintained, together with the founder, a **banking software platform used by 30+ client banks**, covering identity verification, international money transfers, and currency trading.
- Built a **custom search system** that stays instantly in sync with the platform's main database, used to power background screening (PEP and sanctions-list checks) on new customers.
- Deployed and maintained the platform separately for **two countries** (North Macedonia and Germany), each with its own environment.
- Trained and mentored **6 interns** on the team's tools and workflow, helping them get productive faster.
- Hardened **security** on sensitive banking features (identity checks, money transfers, permissions) with OAuth 2.0 (user login, service-to-service and bank-client access), JWT and refresh-token rotation.
- Fixed a **performance bottleneck** that was slowing the platform down during peak transaction periods, by adding Redis caching and rewriting the slow MySQL queries that were causing it.

Xient GmbH

Germany (Remote)

Backend and AI Engineer

Jun 2024 – Sep 2026

Tech: FastAPI, Python, Go, AWS, Next.js, React, SAP, Copilot Studio, Terraform

- Built a live **business dashboard inside Microsoft Teams** (FastAPI, SAP BW/4HANA KPIs) so employees could see company performance data without leaving Teams.
- Built a **tool that crawls an internal documentation site** and exports organized PDFs, with live progress.
- Connected the company's **internal SAP system to an AI model running entirely on local company hardware** (Ollama on an Nvidia DGX Spark, via RFC/BAPI and OData), so staff could ask questions about business data without any of it leaving the building.
- Built **Microsoft Copilot Studio agents** backed by Power Automate flows that query the company's on-premise SAP system (OData through a data gateway, read-only), so purchasing and finance staff can ask plain-language questions about contracts, account balances and production orders.
- Built an **AI assistant** answering questions from company documents and live SAP data, with a from-scratch search-ranking step benchmarked against a ChromaDB baseline.

DAWN

North Macedonia (Remote)

Founder

Jul 2026 – Present

Tech: Go, Angular, PostgreSQL, Terraform, SSR/SSG

- Built and launched **DAWN**, a bilingual (English/Macedonian) platform that teaches coding and economics, designed, built, and deployed solo, including the Terraform-managed infrastructure. Has delivered lessons to **30+ students**.
- Built the backend in **Go** with a **PostgreSQL** database and the frontend in **Angular**, set up so pages load fast and rank well in Google search.

Support Kocani

North Macedonia

Volunteer Developer

Mar 2025 – Apr 2025

Tech: PHP, Laravel, AWS, OpenAI Vision API

- Launched a donation-tracking website in **72 hours** during a local disaster, and used AI to auto-read bank transfer screenshots, cutting manual data entry by **about 4 hours a day**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Java, C#, Python, SQL, Bash/Shell, HCL

Web & APIs: Angular, React, Spring Boot, Node.js, NestJS, .NET, REST, OpenAPI, HTML, CSS, SEO

Databases: MySQL, PostgreSQL, MongoDB, Redis, AWS RDS

Cloud & DevOps: AWS (S3, EC2, IAM, CloudFront, Lambda), Terraform, Docker, Kubernetes, CI/CD, GitHub Actions, Linux

Data & Architecture: ETL Pipelines, PySpark, Kafka, Pandas, Databricks, Microservices, Event-Driven

AI & ML: RAG, Vector Search (ChromaDB), LLM Agents, Tool Calling, Ollama, Copilot Studio, AI Automation, OpenAI
